

Community Rolling Action Plan (CoRAP) update covering the years 2024, 2025 and 2026

The Community rolling action plan (CoRAP) update for the years 2024-2026 lists 28 substances suspected of posing a risk to human health or the environment, for evaluation by 11 Member State Competent Authorities, under the substance evaluation process of the REACH Regulation (EC) No 1907/2006 (Articles 44 to 48). The plan contains 11 newly allocated substances and 17 substances already included in the previous CoRAP 2023-2025 update, published on 21 March 2023. For 11 out of these 17 substances, the evaluation year has been postponed, mainly to await submission of new information requested under dossier evaluation.

Out of the 28 substances to be evaluated, 10 are to be evaluated in 2024, 13 in 2025 and 5 in 2026. However, for substances listed for years 2025 and 2026, changes can be introduced in the next CoRAP update in 2025.

The remaining 1 substance of the 24 substances listed in the previous CoRAP 2023-2025 update is withdrawn from CoRAP as substance evaluation has been considered currently of low priority. For this substance, a compliance check is needed first. The substance can be placed in the CoRAP list again, if after the conclusion of the dossier evaluation process, concerns would remain beyond what can be clarified through dossier evaluation.

The CoRAP update has been prepared in close cooperation with the Member States, taking into account the criteria for selection of substances¹. A draft CoRAP was submitted on 30 November 2023 to the Member States and to the Member State Committee (MSC) for its opinion and published on the ECHA website on 13 December 2023. ECHA adopted the CoRAP update based on the opinion of the MSC, which was adopted on 13 February 2024, and published on 19 March 2024 on its website.

Further information

A description of the substance evaluation process and CoRAP is available on ECHA's website².

In the CoRAP update, the grounds for the initial concern, which triggered selection of substances for evaluation, are briefly described. Detailed justifications for inclusion of substances in CoRAP are provided in the justification documents available in the dynamic table published on the ECHA website³.

In the CoRAP, the contact information of the Member State Competent Authority is provided for each substance to facilitate interaction of registrants with evaluating authorities. ECHA encourages such interaction, to clarify any concerns related to the substances in question⁴. While this applies to all substances on the CoRAP, it is particularly relevant for substances to be evaluated in 2024.

⁵ Further concerns may be identified during substance evaluation process.

⁶ (EC: 217-121-1; 227-033-5; 242-895-2; 248-607-1): due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

⁷ (List No: 701-246-8; 701-463-8): due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

⁸ (EC: 202-773-1; 202-826-9; 905-459-9 (previously registered as EC 246-835-6)): due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

⁹ Previously registered as diisopropylbenzene, EC 246-835-6, CAS 25321-09-9. (EC: 202-773-1; 202-826-9; 905-459-9 (previously registered as EC 246-835-6)): due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

¹⁰ Dossier evaluation ongoing, and the process to be completed before initiating substance evaluation. Substance evaluation not expected to start by 2025.

¹¹ Dossier evaluation ongoing or needed, and the process to be completed before initiating substance evaluation. Substance evaluation not expected to start by 2026.

¹² Dossier evaluation process to be completed before initiating substance evaluation. The substance may be put in CoRAP again, if after conclusion of the dossier evaluation process, concerns would remain, beyond what can be clarified through dossier evaluation.
